PROFESSIONAL SUMMARY

Senior Data Analyst with over seven years of specialized expertise in transforming complex, multisource datasets into strategic business metrics and business intelligence for C-level leadership. Mastered the design of scalable data structuring and analytical frameworks and automated reporting systems — from daily dashboards to monthly summaries — that bridge the gap between raw data and executive decision-making. Orchestrated high-impact analytics projects for 15+ Fortune 500 clients, achieving an 85% reduction in manual processing through advanced Python-driven process automation and SQL optimization. Seeking to apply expertise in business intelligence, data validation, and hypothesis testing to a Lead Data Architect role requiring proven success in managing global analytics deployments and driving data governance across diverse international markets.

SKILLS

Statistical Analysis, Business Intelligence, SQL Analysis, Python Programming, Apache Superset, Data Visualization, Data Modelling, Data Integration, ETL Processes, Dashboard Development, Data Governance, Reporting Analytics, Market Research, Sales Analytics, Process Automation, Predictive Modelling, Insight Generation, Data Mining, Database Design, Quantitative Methods, Big Data, Strategic Reporting, Cloud Analytics, Project Management, Decision Support, Performance Metrics, System Optimisation.

EXPERIENCES

Senior Data Analyst

Optimetriks | Nairobi, Kenya | February 2019 – Present

Roles and Responsibilities:

- Spearheaded executive-level insight generation by transforming fragmented datasets into single source of truth daily dashboards and monthly summaries and actionable recommendations and strategic roadmaps for C-suite leaders across 30+ countries in a multi-country shared services environment.
- Accelerated operational efficiency by 85% through the design and deployment of Python-based workflow process automation and data structuring tools that eliminated manual reporting bottlenecks and reduced internal controls risk.
- Delivered sophisticated business intelligence solutions for 15+ Fortune 500 clients including Nestlé and Vodacom by building interactive Power BI and Tableau ecosystems featuring exception reporting, metric accuracy tracking, and real-time financial reporting dashboards.
- Optimised global web application performance by applying advanced machine learning and data science techniques, including anomaly detection and hypothesis testing, to enhance user behavior analysis and backend system responsiveness.
- Orchestrated cross-functional stakeholder management and project delivery across distributed teams in Europe, Asia, and Africa using asynchronous virtual collaboration tools to ensure seamless digital transformation deployment.
- Mentored a team of junior analysts in advanced SQL, data validation, and BI best practices, increasing departmental output and technical capability by 25% through structured knowledge-sharing aligned with AI-driven analytics and forecasting model development.

Career Break

Professional Development & Freelance | Remote | January 2018 – December 2018

- Executed remote data entry projects for diverse clients while completing intensive technical upskilling in Python, SQL, and Tableau to bridge the gap toward advanced data analytics.

Deputy Presiding Officer

Independent Electoral and Boundaries Commission (IEBC) | Nairobi, Kenya | October 2017 – December 2017

Roles and Responsibilities:

- Directed a multidisciplinary team of six officials to ensure 100% compliance with statutory electoral protocols during high-stakes national operations.
- Maximised team performance under extreme pressure by implementing rigorous internal controls, accountability standards, and real-time conflict resolution strategies.
- Managed secure data transmission protocols for electoral results, maintaining zero-defect financial reporting standards across all assigned polling stations.
- Optimised resource allocation for polling materials by coordinating logistics via remote communication channels with central operations hubs.
- Supervised technical troubleshooting of biometric identification systems, reducing voter processing time by 15% through proactive maintenance.
- Audited all final documentation for accuracy before submission, ensuring a complete and legally defensible record of all electoral activities.

Data Entry Clerk

Independent Electoral and Boundaries Commission (IEBC) | Nairobi, Kenya | August 2017 – October 2017

Roles and Responsibilities:

- Processed high-volume voter registration records with a 99.8% accuracy rate, surpassing departmental benchmarks for data integrity and speed.
- Resolved stakeholder inquiries promptly by extracting and verifying data points from central databases to provide reliable public information.
- Collaborated with remote data verification teams to synchronize local records with national databases using encrypted cloud-based systems.
- Streamlined document filing procedures, reducing retrieval time for physical records by 30% through the implementation of a systematic indexing code.
- Identified and corrected data anomalies in legacy records, applying anomaly detection principles to prevent potential duplicate entries and ensure database cleanliness.
- Executed daily data backups and security checks to safeguard sensitive information against unauthorized access or system failures, maintaining strong internal controls at all times.

OTHER EXPERIENCES

- **Internship** | Mambo- Micro Systems Limited | Nairobi, Kenya| June 2016 - August 2016
- **Enumerator** | Ruiru County Children Office | Ruiru, Kenya | July 2014 – September 2014

EDUCATION

- **Bachelor of Science in Mathematics and Computer Science** | Multimedia University of Kenya | 2017

CERTIFICATIONS

- **SQL Expert** | LinkedIn
- **Data Science** | Philips Kenya

TOOLS

Power BI, Tableau, Apache Superset, SQL, Google Sheets, Python, PostgreSQL, MySQL, Google BigQuery, Jupyter Notebooks, Excel (Pivot Tables, Lookups), Git, JIRA, Trello, Slack, Zoom, Microsoft Teams.

LANGUAGES

- English- Fluent
- Swahili- Native
